# Maintenance

The large bonnets can be easily opened to allow major maintenance operations to be carried out quickly and efficiently, while preserving operator safety.

The intervals of maintenance have been extended to reduce maintenance time, increase machine availability and reduce operating costs.

Slew ring, boom, stick, and rams are lubricated by a centralized automatic system with a 4 kg tank, while cab parallelogram elevating system doesn't require any lubrication due to special bushes.

Air cleaner with self-cleaning cyclone. Lower maintenance time and costs, higher efficiency for the air filter, optimum working conditions for the Diesel engine.

Automatic greasing of the slewing ring teeth.

Aluminium large meshes radiators, with automatic thermostatic reversible fan increase cleanliness of the radiators and reduce Diesel consumption.

The self-lubricating anti-friction bushes consist of a glass fibre load-bearing layer and a machinable sliding layer of fibre material with epoxy resin with PTFE.

Centralized automatic greasing system (as standard), to make easier service operations.

**Eco-friendly choice:** No lubricant.

**No daily maintenance:**

Reduced interventions and maintenance downtime for lubrication/greasing.

**Cost savings:**

No lubrication system. Less grease costs.

**Used in heavy duty environments:**

No starting problems, corrosive environments, humid, cold climates.

# Safety

Solmec has always been committed to work safety. The “OWD” (Overload Warning Device), antirollover system, controls the load handled by the machine and stops the movements when it exceeds the maximum load allowed, authorizing only the movements that permit to be brought back the load to the safety position. The operator presence system allows the use of machine controls only if the operator is seated in the driver’s seat with the left armrest lowered. Non-slip steps and side handrails make it easier for the operator to get on and off the machine.

Wide steps standard included, for a safer and easier access on the machine and to the main maintenance and refuelling areas.

As standard, the operator’s cab with hydraulic vertical elevation provides a 4.0 m operator eye height.

As an option, the operator’s cab with hydraulic parallelogram elevation provides a 4.6 m operator eye height.

Double rear mirrors with wide angle view on right and left side.

As option: rear camera with 7” color display into the cabin. Possibility to fit a camera on the right side and/or under the cab (or kit 3 cameras).

# Comfort

Easy access button panel for headlights, windshield wipers and bluetooth® radio.

Automatic air conditioned as standard.

3 air conditioning fans separated from the main radiators for a more efficient cooling system.

Roll-up sun blind and wiper on the roof

Front-mounted roller sun blind.

Driver's cab with large glass surfaces and left sliding side window.

Adjustable steering column ...

... for a comfortable driving position.

3 Standard LED headlights on cab.

## SOLMEC QUICK COUPLER

# TECHNICAL DATA EXP 5015

## DIESEL ENGINE

TCD 3.6 L4 T5 – TIER 5 (Stage V) – Ecological with catalytic converter DVERT® and electronically controlled injection - Particulate filter and AdBlue® - 4 strokes - 4 cylinders in-line - turbocharged with intercooler - common rail - direct injection - water cooled - electric starting system 24 V

Displacement:	3600cm <sup>3</sup>
Power:	85 kW (116 HP) @ 2100 rpm
Max torque:	460 Nm @ 1600 rpm
Tank Capacity:	220 l
AdBlue® tank capacity:	15 l

## HYDRAULIC SYSTEM

Open circuit LOAD SENSING with variable displacement axial piston pump with oil flow adjustment according to the load requirements, 4 power levels selectable from the dashboard, distributor block composed by 7 elements electro hydraulics, with high pressure control valves and antishock valves on each element.

Max. flow:	210 l/min
Max. Pressure:	300 bar
Hydraulic tank capacity:	200 l
Hydraulic circuit capacity:	250 l

Additional pumps for auxiliary services.

Hydraulic oil cooling by means aluminium large mesh heat exchanger combined with engine radiator. Automatic reversible fan for radiator cleaning.

## TRAVEL

Hydrostatic with 4 wheel drive by means of a variable displacement hydraulic axial piston motor mounted on a two speed gearbox hydraulically operated from the cab coupled to the rear axle.

Travel controlled by two separate pedals (one for each travelling direction).

Travel speed (in both directions)

Working speed:	from 0 to 5 km/h
Travel speed:	from 0 to 12 km/h

Differential axles 2,50 m wide with planetary reduction gears on the hubs. Braking valve integrated on the hydraulic motor.

## STEERING

Hydraulic steering system powered by an independent pump. The front floating steering axle can be hydraulically locked from the cabin in any position.

## TYRES

n° 8 twinned solid rubber tyres 9.00x20 with spacer rings  
n° 8 twinned tyres 9.00x20 - 16PR (as option).

## BRAKES

**SERVICE BRAKES:** Acting on the transmission using the self-braking characteristic of the travel hydrostatic system.

**PARKING AND EMERGENCY BRAKES:** Negative type with multiple discs oil bath on the rear axle and electro-hydraulic control for release.

## SWING SYSTEM

Unlimited rotation in both directions by means of an axial piston hydraulic motor with integrated control valve, splined to a planetary reduction unit with oil bath gears. High diameter double row ball bearing ring with internal teeth. Automatic greasing system

Max rotation speed:	7 rpm
Tail rotation radius:	2,25 m

## OPERATOR'S CAB

Hydraulically operated raising driver's cab mounted on a parallelogram linkage installed on silent block with large windows of tinted heat resistant safety glass; lateral opening window, upper and front glasses with safety grids and wipers. Winter heating and automatic air conditioned installed as standard with adjustable outlet. Radio preset.

Operator's seat with shock absorbing suspension, headrest, lumbar support, belt winder, electric seat heating device and armrests adjustable height and angle. Many possibilities of adjustment according to operator's weight and size.

## INSTRUMENTATION

Consists of a coloured display on the dashboard, includes: Engine speed indicator, fuel level, water thermometer, hour counter, hydraulic oil temperature, Volt, oil engine pressure, fuel consumption, load rate of the engine, engine diagnostics, and maintenance program.

Warning lights showing: air cleaner and oil filter clogging, park brake, brakes failure, lights, hydraulic oil low level, urea level, particulate filter regeneration, etc...

## CONTROLS

N° 2 electronic controlled joysticks to carry out the main four operations integrated with the armrests.

Electronic proportional rollers for front blade and/or outriggers and telescopic selector arm and/or grab rotator.

Electro hydraulic devices for controlling hydraulic raising of the cab, parking brakes, front axle oscillation lock, gear box.

## ARMS

With reach from 7 to 9 metres. Dipper stick could be also telescopic or selector arm.

## SOUND LEVELS

### NOISE LIMIT

Directive	2000/14/CE
Directive	2005/88/CE
Regulation	2024/1208/UE

Sound pressure level at the operator's position: LpA 81 dB (A)

## ELECTROMAGNETIC COMPATIBILITY

(Dir. 2014/30/UE) - The machine complies with the specified limits for both emissions and immunity.

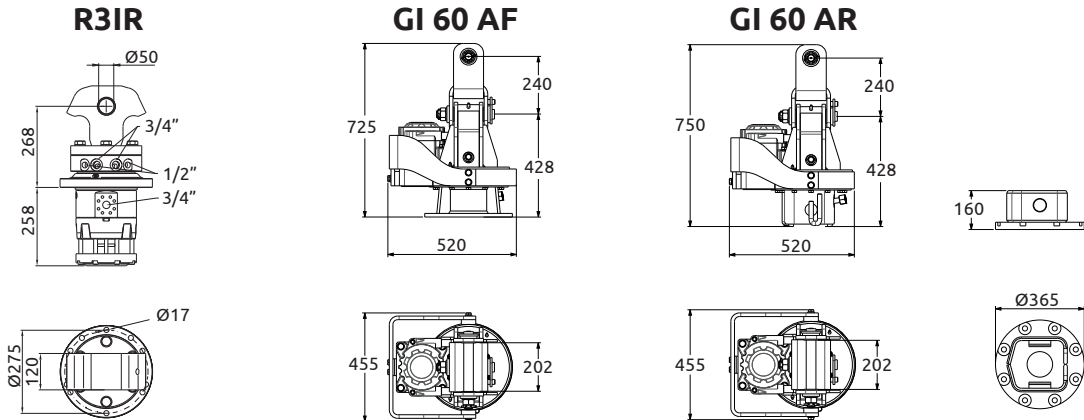

## OVERLOAD WARNING DEVICE

Machinery Directive 2006/42/EC

Device for monitoring the machine's stability based on the load being handled and its position. It provides hazard warnings via acoustic and visual signals and automatically inhibits machine movements when stability limits are reached. It also displays the lifted load and the maximum permissible load in any working position.
